Subject Quiz 6 Year: Month: Day:

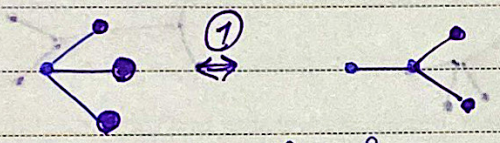
Homeomorphically Irreducible Trees of size n=10.

It is an acyclic graph where there are more than two branches from each internal vertex.

The size n=10 means there are 10 vertices (internal or edge)

There are 2 transformation:

① Takes three leaves (edge vertices) from an interal vertex and generates a new internal vertex with two leaves



② Move a leaf from one internal vertex to another.
